Please stop wasting the Department of Justice's valuable time and the taxpayers far more valuable money on persecuting Microsoft Corporation. Having the Federal Government pester anyone about perpetuating a monopoly is akin to having Ted Kennedy scold somebody for bad driving - its downright hypocritical. If pleas against wastefulness aren't enough to move you, then please consider the fact that millions of citizens have their retirement money invested in Microsoft, and the specter of Federal lawsuits and penalties due to baseless anti-trust actions by the DOJ is needlessly devaluing their investments.
